Dinosaur Tracks

Worksheet 3

The Dinosaur Bone

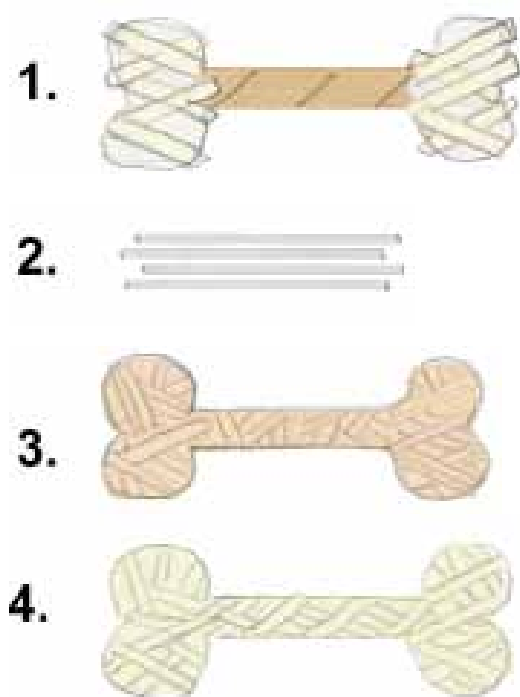

You can make a dinosaur bone with a big cardboard tube, some newspaper and glue.

You need:

- A large cardboard tube (e.g. a kitchen paper tube)
- A large plastic bowl
- Some liquid glue
- A newspaper
- Some sticky tape
- Some colour paints
- A paint brush

INSTRUCTIONS

1. Scrunch sheets of newspaper into balls and tape them to the ends of the big cardboard tube. Pour some liquid glue into the bowl.
2. Cut out many at least 20 strips of newspaper, about 1 cm wide each.
3. Dip a strip of newspaper into the glue then wrap it around your dinosaur bone. Cover the entire bone then let it dry for about 2-3 hours.
4. Paint the bone. Now you have a wonderful dinosaur fossil!
